AVIATION INVESTIGATIONS

August 13, 2010

(8 P.O.S.T. Credit Hours)

This course is designed for law enforcement personnel who have had little or no exposure to the world of general aviation. Topics covered include an overview of the National Air-Space (NAS) system, general airport ground operations, airmen licensing, aircraft registration, applicable federal and state laws concerning aviation issues, and aviation smuggling issues and indicators.

After the completion of this course, students will have gained the knowledge and ability to recognize legal pilot licenses, medical certificates, aircraft registration, and airworthiness certificates. Students will also learn how to use open source databases to verify the current status and validity of licenses and registration. Students will have gained knowledge of federal and state laws concerning aviation within their jurisdiction. The course concludes with a hands-on scenario at a local airfield where students will apply their new found knowledge through participation in a FAA Ramp Check.

- Basics of the Federal Aviation Administration (FAA)
- The National Air Space (NAS)
- Airman Information
- Aircraft Information
